

# UK MOBILE PHONES

Mobile/Cell phones are one of the most popular and convenient ways of communicating in the UK. Before you buy one check out a few suppliers and compare packages they offer. Don't be fooled by a deal that initially seems cheap it may end up costing you more on monthly line rental or call charges.

You have a number of options available to you when purchasing a mobile;

**1. Pay-as-you-go** – You purchase the phone and buy credit in advance in the form of vouchers or direct from the network supplier. No contract or bills.

**2. Pay Monthly** - You sign up to a network for a period of usually 12 months and the network bills you on a monthly basis for calls and services you have used.

**3. Pre-paid** – Similar to pay monthly however you pay for your calls in advance and if you use more calls than you've paid for the network will bill you monthly.

**Education.uk.com** in the UK can help you with a mobile phone and have one ready for you when you arrive.
